

K-LOVE serves the Greater Kansas City area that includes rural Lafayette county. I am requesting that the proposed LPFM not be allowed to expand and disrupt my ability to tune in to K-LOVE. I listen to this station at home, in the car, and at work - it is a station that I can leave on and not be concerned about what my Grandchildren might hear in either music or from the DJs.

The fact that this is a listener supported station atests to the fact that many people like it enough to spend their money directly in support of the radio station. It seems to me that there are enough stations out there that disrupt other stations as it is - please do not add additional interference levels.
